

Women in Technology and Science (WITS) in association with the European Parliament Office in Ireland

Invite you to a unique event honouring Prof. Jocelyn Bell Burnell at the European Parliament Office in Ireland. There will be a presentation of a unique piece of artwork by Spanish artist Margarita Cimedevila inspired by Prof. Bell Burnell.

Jocelyn Bell Burnell, one of the pre-eminent astrophysicists of our time discovered pulsars as a graduate student in Cambridge. She went on to have a distinguished career as a radio astronomer and has been awarded many accolades. She will discuss her work in an informal interview.

In 2012 Jocelyn chaired an expert group in Scotland, to increase the proportion of STEM qualified women in the workplace and in senior positions in universities, government and industry '**Tapping all our Talents Women in STEM: a Strategy for Scotland**'. She will share insights and recommendations.

Date: Thursday 20th June, 2013

Time: 12:30-14:30 (networking and lunch from 12 noon)

Location:
European Parliament Office in Ireland, 43 Molesworth St, Dublin 2

Guest Speaker:
Prof. Jocelyn Bell Burnell

Moderated discussion:
There will be a short focused discussion on the relevance of 'Tapping All Our Talents' recommendations to Ireland.

Live Interview:
Acclaimed science journalist Dr. Claire O'Connell will interview Prof. Bell Burnell.
